

Cricket '86

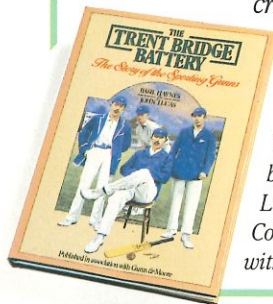

EQUIPMENT • CLOTHING • FOOTWEAR

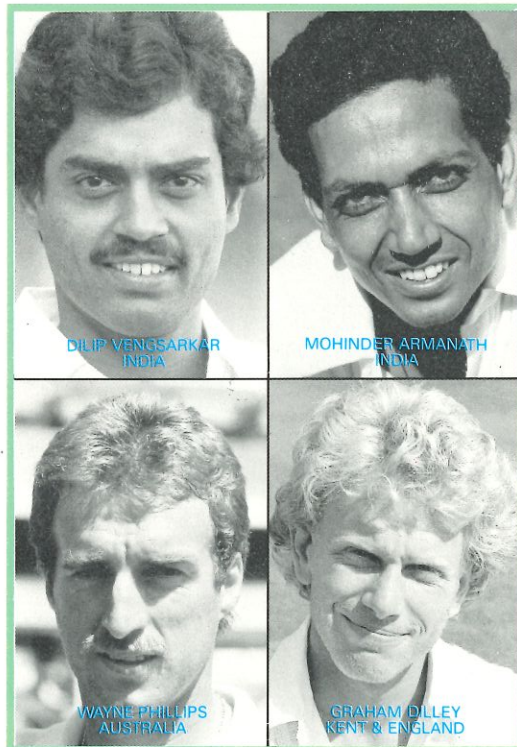

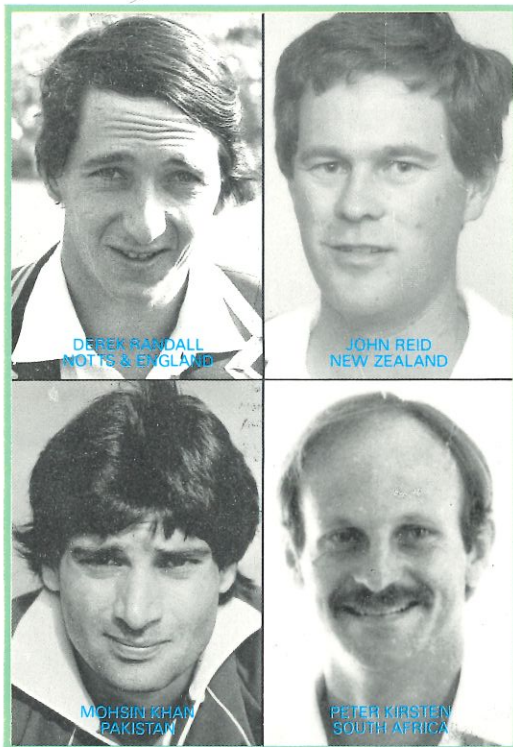

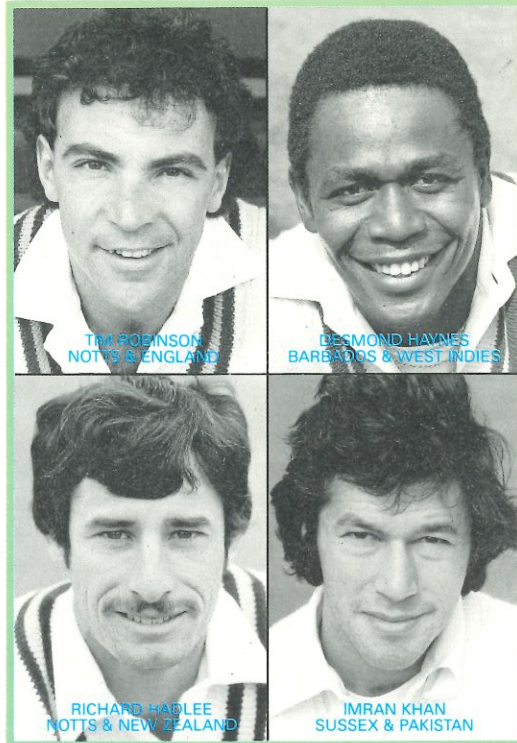

Meet the team...

The Gunns are one of cricket's great families: William, his nephews, John and George and George's son, George Vernon. All four played for Nottinghamshire, and William, John and George Test cricket for England.

William Gunn made his first bat in 1885 and for over 100 years Gunn & Moore has been dedicated to creating cricket equipment of the finest quality — the first choice of cricketers everywhere.

The Trent Bridge Battery, the story of the Sporting Gunns by Basil Haynes and John Lucas, is published by Collins Willow in association with Gunn & Moore.

MAESTRO

a virtuoso bat in every respect

From the finest naturally seasoned willow and the world's best bat makers comes **Maestro**.

Unique contoured edge provides extra thickness at sweet-spot line and controlled graduated taper to shoulder and toe.

Scientifically designed maximum swell flows to stronger toe and weight-reduced flatter shoulder.

Internationally acclaimed Gunn & Moore laminated cane handle with carbon-fibre springing and double rubber cushion grip virtually eliminates jarring on mis-timed shots.

The exclusive design elements combine together to produce the classic bowed appearance to the blade.

Superb balance packs power behind every stroke.

Striking yet dignified livery incorporates distinctive coachlines on new contoured edges.

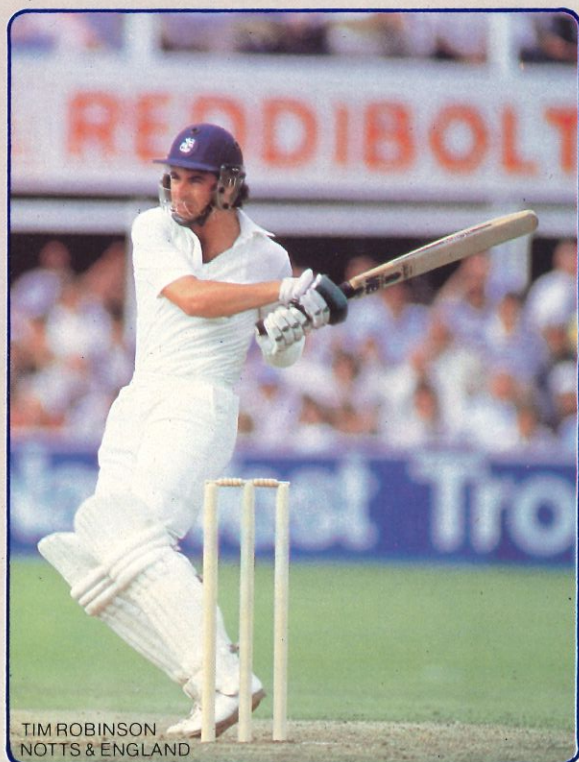

Carbon Fibre Handle

Carbon fibres laminated with choicest selected natural cane.

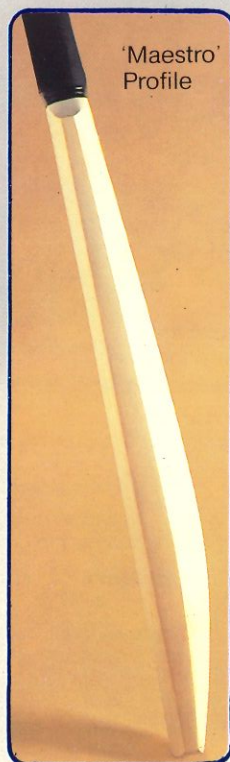

Better springing and improved damping for more comfort and 'feel'.

Lighter than a conventional handle, the carbon fibre handle permits a bigger blade without increase in overall bat weight for more powerful driving, improved balance and control.

Carbon Fibre handle also available in Autograph range. See page 4.

Autograph

Over a Century of tradition and craftsmanship is enshrined in the **Autograph** bat. Each receives the individual attention of experts at every stage of manufacture — from the selection of the choicest lightweight willow to the final balancing of the blade.

Autograph, Cannon and Clubman bats are available in three distinct shapes:

Traditional — below 2lb 8oz

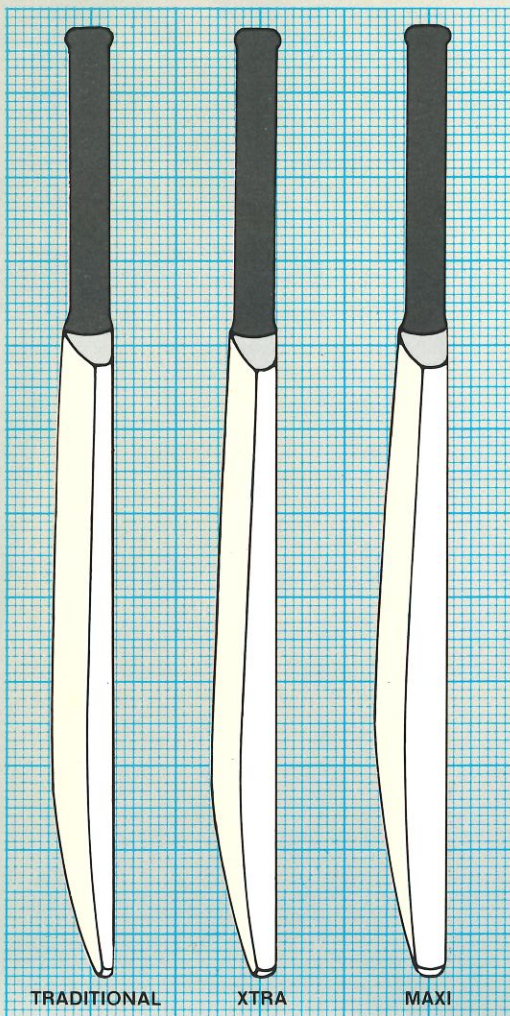

Classic profile. The first choice of players for whom the greatest degree of manoeuvrability is paramount.

Xtra. — *New shape* 2lb 8oz — 2lb 10oz

Incorporates thicker edges with superb pick-up.

Maxi — Exceeding 2lb 10oz

A substantial bat featuring specially thickened edges and perfect weight distribution for superior balance and effortless power.

Covered bats

The application of modern protective coverings enhances bat durability, preserving the blade in extremes of temperature and humidity as well as being a defence against hard balls and mishap. Ready to play — need no oiling.

Duracover Facing

Unique Gunn & Moore overlay bonded to bat face. Super tough and lightweight. Virtually indestructible. Dramatically reduces blade damage.

Polystar

Durable super tough resinated Poly RS84 coating. Simple to keep clean with damp cloth.

Carbon fibre handle — see page 3

Prime English Willow with tough protective polycoating. Built for all playing conditions.

RICHARD HADLEE
NOTTS & NEW ZEALAND

Important

Kashmir willow has some different characteristics from English willow. The faces of 'Scoremaster' bats are pressed to give a tough resilient surface, but because Kashmir willow is rather softer than English willow, indentations and some surface cracks will appear in use. Such facial markings should be ignored, however, as they are normal for this type of willow and will not detract from the continuing good performance of the bat.

1900 Scoremaster
HARROW SIZES 6/2

Made in India. First choice Kashmir willow. Design and technical specifications as used in our Nottingham, England Factory.

Additional option, please specify

Finish: Polystar

Cricket Sets

Excellent value, ideal gift items

Choice of two sets comprising:

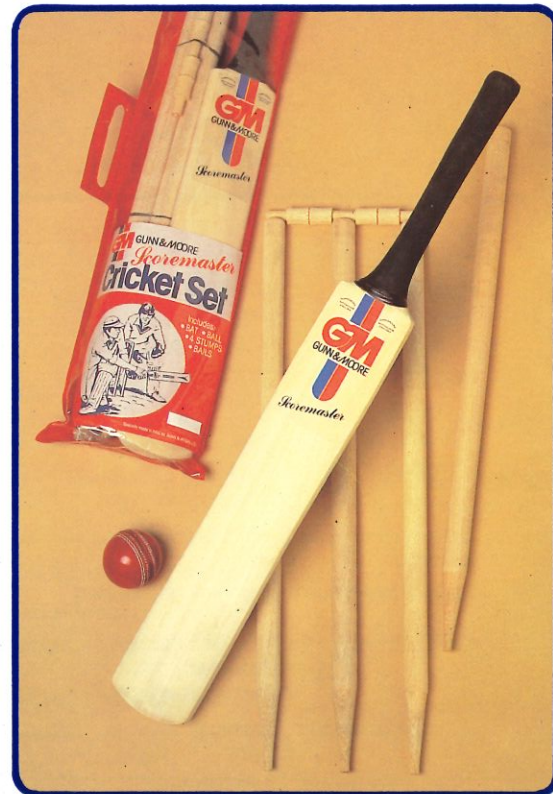

- 1 each Scoremaster bat
- 1 each Cricket ball
- 4 each Stumps
- 1 each PVC Carry bag

- Size 5 bat
- 26" stumps
- jnr. leather ball

4200, Size 4:

- Size 4 bat
- 25" stumps
- jnr. composition ball

Bat Repairs

To avoid delay

Please send all repairs direct to our Nottingham factory:

**Gunn & Moore Ltd.,
Haslam St., Castle Boulevard,
Nottingham, NG7 1EZ**

To ensure speedy service please label the bat giving full particulars of work required.

Re-handling

We offer three qualities.

1. 'Autograph' carbon fibre
2. 'Autograph'
3. Economical twin-spring.

Re-blading

A new blade of any grade of bat described in this catalogue can be fitted to any handle regardless of make. The blades of bats sent for re-blading may be sawn off just below the splice to minimise cost of carriage.

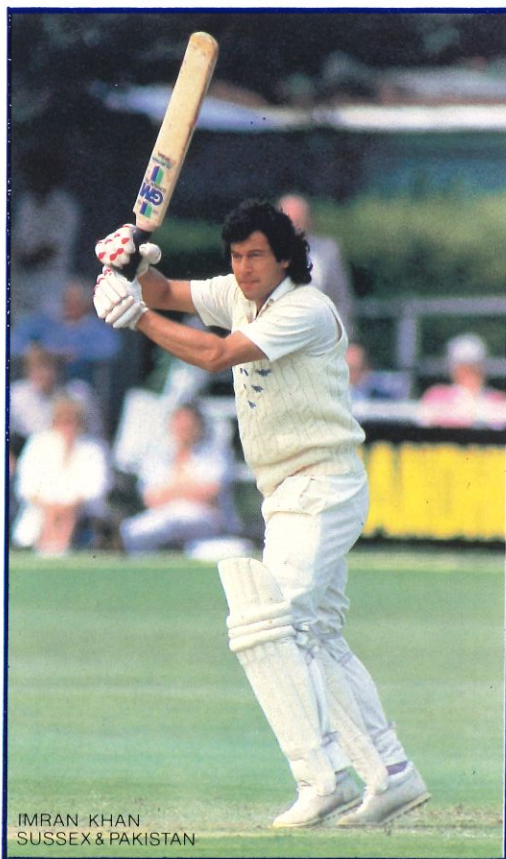

General Bat Repairs

Cracks and splits can be repaired by glueing and the addition of wraps. We can also let pieces of willow into the blade or add an inset to the toe.

Let us know if new rubber handle grips are to be fitted.

If possible send the bat during the close season. It will enable us to provide you with a speedier service.

All repairs are executed with the same care which goes into the manufacture of new equipment. Our repair services are not restricted to goods of our own manufacture.

IMRAN KHAN
SUSSEX & PAKISTAN

Cricket Balls

3011 Special Super County Grade A

Scientifically developed semi-matt finish for extra durability and control. Special hand stitched seam for all conditions and techniques.

3010 Super County Grade A

3015 County Star

3020 Super Star

3030 Clubman

3031 Clubman Junior 4¾oz.

Gunn & Moore Leather Cricket Balls are all hand made to our exacting specifications and under our close personal supervision in overseas factories. Each model has been rigorously tested under all playing conditions over a long period to ensure complete satisfaction. All balls conform to M.C.C. regulations.

Nonjar

Unique Gunn & Moore moulded ball. All the bounce and playing characteristics of a conventional leather ball but without the hardness. Will not harm bats — not to be confused with cheap composition balls.

3040 Nonjar Senior

3041 Nonjar Junior

Available Red or Yellow

Technical Notes:

All Gunn & Moore leather cricket balls are quartered balls, hand stitched. The centres are all constructed of wool and natural cork layers around a natural cork centre.

Sample balls selected at random from each manufacturing batch are tested in play.

Strict quality control of both materials and construction methods ensure, as far as possible, perfect shape retained during play, true seams and avoidance of 'hard' balls.

Outer Case

Choicest butt leather, alum tanned, pre-treated for wet conditions and abrasive resistance and pre-stitched to avoid distortion in use.

The leather used for the Gunn & Moore range of cricket balls is graded from the top ball downwards, so that the Super County Ball is made from a very limited portion of the finest skins specially selected and superior in every respect and as the grading pro-

ceeds, other selected portions of the skin are used.

Even the lowest grade ball is made from a portion of a top quality skin.

Inner Core

All inner cores are made from layers of well oiled new wool and worsted yarn and natural cork around a cork centre. The cores are air dried for two to three months before being sewn in the case. The baking of cores to accelerate drying is assiduously avoided, as this destroys resilience making the finished ball hard.

Wool Layers in Core and Stitches in Seam

The number of layers of wool and cork and the number of stitches in the seam vary through the range as follows:

	Wool Layers	Seam Stitches
Super County	6/8	80/85
County Star	5	72/75
Super Star	5	72/75
Clubman	5	68/72

Batting Gloves

for cricketers who demand the very best.

Maximum protection, greatest possible comfort from new with no 'breaking-in' necessary, and long life are achieved by meticulous attention to design, choice of materials and workmanship.

All batting gloves available left hand — please specify.

5130 Pro-Tec Mens

New lightweight leather glove. 'Plastazote' padding provides exceptional protection and comfort. Pre-shaped fingers. Nylon gussets. Leather straps at tips of first two fingers, bottom hand, stop gusset opening for improved finger tip protection. Elasticated wrist, 'Velcro' fastening.

5135 Leather, long overlap Mens

Finest supple leather. Long leather padded overlap for extra protection. Pre-shaped fingers. Nylon gussets. Leather straps at tips of first two fingers, bottom hand, stop gusset opening for improved finger tip protection. Elasticated wrist, 'Velcro' fastening. Features full cotton inner lining for extra comfort and perspiration absorption.

5100 Derek Randall Mens

Used by Derek Randall, Notts & England. All leather with extra long finger rolls and additional sponge padding between rolls and glove. Fingers pre-shaped, gusseted side with extra padding between thumb and first finger for comfort and longer life. Leather straps at tips of first two fingers of bottom hand stop gusseting opening, to provide improved finger tip protection. Elasticated wrist, 'Velcro' fastening.

5115 Leather, overlap Mens

Finest supple sheepskin glove. Net back. Extra long leather finger rolls and one horizontal roll. Leather padded overlap to first two fingers, bottom hand. 'Velcro' fastening.

Technical Notes:

Batting Gloves

Leather

Sheepskin, full chrome tanned. Special process oils give long lasting suppleness and ensure leather stretches and recovers with every movement of the hand.

Sheepskin has high tensile strength for tear resistance.

No dressing or salt is used in the prep-

paration of the leather as these cause surface deterioration and stiffening in use. Drumming with a mixture of titanium oxide and french chalk gives improved surface and texture.

Padding (unless otherwise stated). Pure Kapok. Will not compact or become lumpy in use, as does cotton waste which is widely used.

Thread

Three ply core spun thread—a core of nylon and twin glazed cotton braiding. Cotton thread used alone is too weak to take the strains involved. Nylon thread

used alone does not lay flat and may cut the material causing splitting in use.

Manufacture

Skins are preserved in batches, so that any pair of gloves is made out of one batch of skins thus preventing differential stretching and ensuring the maintenance of shape of finished glove and uniformity of texture and colour. Particular attention is paid at the cutting stage so that the natural stretch in the leather becomes available across the hand rather than in the direction from the wrist to the finger tips.

Scoremaster

Batting Gloves
for the budget conscious.

Top protection, comfort and reliability by use of materials selected for their hard wearing properties and economic cost to provide ideal equipment reasonably priced for personal, club, school and college use.

All batting gloves available left hand — please specify.

5143 D.R. Protector Mens

Leather palm and fingers, net back. Pre-shaped long finger rolls, gusseted side. One horizontal roll. Extra padding between thumb and first finger. 'Velcro' fastening.

First class classic glove. All leather palm, fabric back. Leather finger rolls. Two horizontal leather rolls. 'Velcro' fastening.

5158 Mens

New budget priced bent finger glove. Strong cotton, mesh back with leather finger rolls. Double wrist protection, front hand. Leather reinforced between thumb and first finger. Elasticated wrist, 'Velcro' fastening.

5162 Mens • Youths • Boys

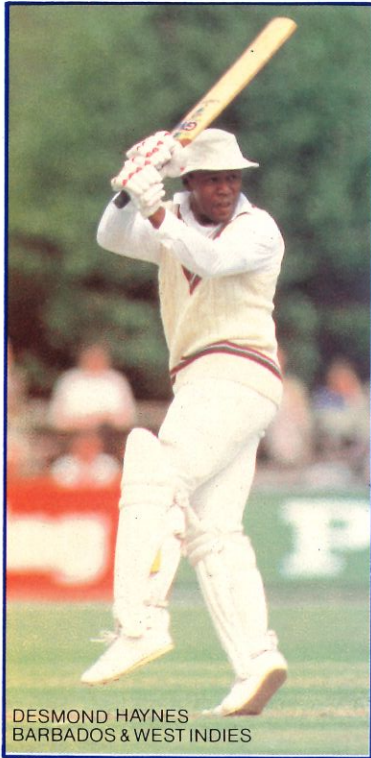

Attractive budget priced leather glove. Red fabric backing, white finger gusseting for extra pleasing appearance. Generous finger rolls, one horizontal roll. 'Velcro' fastening.

5170 Mens • Youths • Boys

Strong cotton glove, leather rolls. Leather reinforcement between thumb and first finger. Elasticated wrist.

A superb range for professional and club use

DESMOND HAYNES
BARBADOS & WEST INDIES

Technical Notes:

Leather

Leather of the same characteristics as used for Batting Gloves is used, but from larger animal skins to give heavier duty leather. Specially selected portions of the skins are used for the finger gussets which take tremendous strain.

Padding

Sponge Rubber and Pure Kapok are used in all models. Tapered rubber finger thimbles are used throughout.

Wicket Keeping Gloves

 P.V.C. lined instep.
5016 Mens

DEREK RANDALL
 NOTTS & ENGLAND

Technical Notes

Padding, rolls and ribs

Padding is a fine yarn drill stuffed with Kapok, this stuffing being vastly superior to cotton waste, being both lighter and non-compacting.

Cane

A stiff cane is used in the ribbing between the stout lining of the pad and the stuffing to provide maximum protection. For cheapness many pads have bamboo instead of cane within the stuffing and the protective effect is inferior.

Straps

Full chrome cowhide fastened through three seams to spread the load.

Buckles

Zinc plated steel riveted to straps for strength. Zinc plating gives better rust protection than the more common nickel plating.
