A NEW STANDARD OF CONSISTENCY

Unique Construction Technology

Molten's unique basketball technology delivers new, enhanced performance for the elite athlete. The new Molten X Technology Range features our revolutionary parallel pebble design to provide increased contact area with consistent feel to enhance ball handling. The new colour contrast of the signature Giugiaro design makes for greater visibility for both players and spectators.

1. Surface

We choose the best surface materials suitable for different basketball environments.

2. Rubber Cover

Is integrated, reinforcing the windings and bladder to more strongly hold the internal structure. BGLX and BGGX are equipped with minute air bubbles in the rubber cover layer, so the feeling becomes softer.

3. Windings

We have found the optimal elasticity and the best durability for our basketballs by using nylon-polyester mixed windings.

4. Bladder

Our basketballs hold air pressure for a long time by adopting a high retention performance butyl bladder.

Consistent Touch

To improve consistency of touch, the shape and placement of each pebble is modified and aligned to create a uniform surface texture, revolutionizing the traditional pebble pattern. This uniformity ensures consistent contact no matter where the ball is held.

Flat-Pebble Surface

The traditional, raised pebble surface of the ball is modified into a flat-pebble finish, to provide maximum grip and control by increasing the contact area.

Deep Channel Basketballs

Deep Channel

Normal Channel

Made from a special rubber compound in order to increase its durability, lifespan and grip. This gives our deep channel basketballs more traction for superior control and accuracy.

Design

FIBA Official 33 Game Ball.

Unique design for the urban game 'Libertria' coined from Latin words 'Liberta' (freedom) and 'Tria' (three).

Enhanced Visibility

Increased contrast between the ball's feature colours provides the ultimate experience in ball visibility. Players can focus on every movement of the ball. Additionally, the rotation of the ball can be seen at greater distances, allowing both spectators and players to see every detail of play.

Full-Flat Seam

By flattening the area around the ball's seams and minimizing the difference in height, Molten's full-flat seams provide consistent back-spin for precise shooting and passing no matter where you hold the ball.

GLOBAL PARTNER

OFFICIAL GAME BALL

Molten is dedicated to providing top of the line basketballs for FIBA, and the global basketball community. By combining innovative technology and superior craftsmanship, Molten continues to create products worthy of play by the world's most elite basketball stars.
